Professional Summary

UI/UX designer with 4+ years of experience creating user-centered digital experiences across web, mobile, betting terminals and back-office platforms. Researched and designed 20+ end-to-end iGaming products, including slots, crash games, table games, betshop and terminal experiences. Skilled in player-focused UX, interaction design, prototyping, responsive interfaces and scalable design systems. Collaborates with product managers, stakeholders and developers to translate business requirements into clear, engaging experiences.

Experience

Soft Construct (Pascal gaming) UI/UX DESIGNER

FEB 2023 – PRESENT

- Research player needs, preferences and behaviors to inform iGaming interface and interaction design.
- Researched and designed 20+ end-to-end iGaming products, including slot, crash, table, betshop and terminal experiences.
- Design betting flows, game interactions and gamification experiences focused on usability, engagement and clear player feedback.
- Create responsive game interfaces for desktop, mobile and betting terminals, alongside back-office, web cashier and betshop tools.
- Develop interactive prototypes and mockups to communicate concepts and gather feedback from stakeholders and users.
- Collaborate with product managers, stakeholders, developers, 2D animators and illustrators to define requirements and deliver designs.

CodeTime

UI/UX DESIGNER

JUL 2022 – FEB 2023

- Designed interfaces and websites, including Sitebuilder, a multifunctional landing-page builder for users without programming knowledge.
- Created user flows, wireframes and interaction designs to make software simple and intuitive, from initial ideas through iteration and implementation.
- Designed workflows for editing text, images, page content and website settings.

Guyq.am (Address.am)

UI/UX DESIGNER

AUG 2021 – SEP 2022

- Designed interfaces for a real-estate platform presenting economy and premium apartments in Yerevan.
- Worked with the business team to understand requirements and created wireframes and high-fidelity mockups for the corporate website and Guyq.am products.
- Presented design work and discussed decisions with internal stakeholders.

Skills

■ UX and research:
