PROFESSIONAL SUMMARY

Product Designer with 5+ years of experience creating user-centered digital products for web, mobile, betting terminals and back-office platforms. Researched and designed 30+ end-to-end iGaming products, including slots, crash games, table games, sportsbooks, betshop and terminal experiences. Skilled in player-focused UX, interaction design, prototyping, responsive interfaces and scalable design systems. Works closely with product managers, stakeholders and developers to translate business requirements into clear, engaging experiences.

WORK EXPERIENCE

Product Designer

Soft Construct (Pascal Gaming) | Feb 2023 – Present

- Research player needs, preferences and behaviors to inform iGaming interface and interaction design.
- Researched and designed 20+ end-to-end iGaming products, including slot, crash, table, betshop and terminal experiences.
- Design betting flows, game interactions and gamification experiences focused on usability, engagement and clear player feedback.
- Create responsive game interfaces for desktop, mobile and betting terminals, alongside back-office, web cashier and betshop tools.
- Designed a reusable betting interface and pop-up system (spin, bet controls, buy bonus, win and feature dialogs) used across multiple slot titles.
- Develop interactive prototypes and mockups to communicate concepts and gather feedback from stakeholders and users.
- Collaborate with product managers, stakeholders, developers, 2D animators and illustrators to define requirements and deliver designs.
- Selected live titles: RockBet, Fighter xXx, Crash, Big Hi Lo, Pixel Road, Tornado Roulette, Bet On Poker, Fortune Ronaldinho, Fortune Pots, Juicy Storm, Golden Keno, Spin To Win Lightning.

UI/UX Designer

Sportcore | Jan 2022 – Feb 2023

- Created sportsbook and casino interfaces from the ground up, defining the visual direction and UI elements across the platform.
- Structured sports navigation, league listings and detailed betting markets to organize dense match information, odds and betting options.
- Designed betslip controls for managing selections, adjusting stakes, reviewing potential returns and accepting odds changes.
- Developed player account panels, promotional banners, announcement pop-ups and navigation connecting sports, live betting, virtual sports, mini games and casino.

UI/UX Designer

Tether Bet | Jul 2021 – Jan 2022

- Designed the sportsbook and casino platform from scratch, establishing its visual style, page layouts and UI elements.
- Designed sportsbook navigation, live and prematch event listings, odds displays and betslip interfaces for selecting bets, entering stakes and reviewing potential winnings.
- Created casino lobby layouts with game categories, provider filters, search, promotional sections and game discovery.
- Developed a consistent interface across the homepage, sportsbook and casino, including navigation, cards, buttons, forms and account controls.

UI/UX Designer

CodeTime | Nov 2020 – Jun 2021

- Designed interfaces and websites, including Sitebuilder, a multifunctional landing-page builder for users without programming knowledge.
- Created user flows, wireframes and interaction designs to make software simple and intuitive, from initial ideas through iteration and implementation.
- Designed workflows for editing text, images, page content and website settings.
